### Firm Secures a Significant Victory for Client Sedecal (Sociedad Española de Electromedicina y Calidad, S.A.) in the U.S. District Court in North Carolina

A jury verdict found that DRGEM Corp., a Korean manufacturer of x-ray equipment, its U.S. distributor DRGEM USA Corp., and Blue Ridge X-Ray had infringed Sedecal's patent. The jury found that DRGEM and DRGEM USA had willfully infringed the patent, and awarded Sedecal \$852,000 in damages. The patent at issue covers the unique arrangement of components within a high voltage transformer that has been utilized in Sedecal's x-ray generators since 2007.

The Neal Gerber Eisenberg team consisted of Brad Rademaker, Mike Turner and Tanvi Patel.
