Neal Gerber Eisenberg Achieves Mansfield 4.0 Certification

Neal Gerber Eisenberg is proud to announce that it has attained Mansfield 4.0 Certification after successfully completing the 12-month certification program led by Diversity Lab. This marks the third year of NGE's participation in the Mansfield program.

To achieve Mansfield Certification, NGE confirmed that at least 30% of the candidates it considered for leadership and governance roles, equity partner promotions, formal client pitch opportunities, and senior lateral positions were attorneys from historically underrepresented groups, including women, attorneys of color, LGBTQ+ lawyers and lawyers with disabilities.

"Our firm has achieved Mansfield certification for several years now and we are proud of our efforts to build a more inclusive workplace," said Bobby Gerber, Managing Partner. "We strongly believe having a diverse team of attorneys and leaders helps us better serve our clients, and the Mansfield Rule is an excellent benchmark for us to measure our progress."

For next year's certification, more than 160 large law firms are participating in Mansfield Rule 5.0, including 49 new firms. All firms that meet the required Mansfield Rule Certification parameters will be able to send their newly promoted underrepresented partners to Client Forums to meet and learn from hundreds of influential legal department leaders.

Neal Gerber Eisenberg is a leading law firm dedicated to handling sophisticated matters for entrepreneurs, public companies, and private businesses and their owners. Our attorneys provide legal business solutions to public and private entities of all types—including Fortune 100 companies, financial institutions, nonprofits and high net worth individuals—in connection with domestic and global business transactions and litigation. The firm has built over thirty years of trusted partnerships with clients that span the globe, and we meet each unique client need with the same personalized service and collaboration that provide the most practical solutions for every matter.
