

## Thomas J. Campbell Jr.

Partner | Intellectual Property

### OVERVIEW

Tom represents clients in patent and trademark prosecution, intellectual property litigation, and post-grant patent challenges before the Patent Trial and Appeal Board (PTAB). Tom has a broad base of experience in various technological and business areas, particularly in pharmaceutical, biotechnology, chemical and medical device inventions. He drafts invalidity opinions, investigates freedom to operate, counsels on strategic portfolio management, and conducts due diligence investigations prior to acquisition or merger.

He has extensive scientific research experience in both industry and academic settings. Tom worked as a pharmacologist in the Advanced Technology Division of Abbott Laboratories to identify safe and efficacious drug candidates. His skill as a researcher was recognized when Abbott honored him with its Global Pharmaceutical Research and Development Award for Leadership. Tom also conducted various chemical and biological research both at the University of Notre Dame and University of Chicago. His chemical research was directed toward organometallic catalysis. His biological research involved investigating the underlying causes of diabetes — including the molecular biology of ion channels and the role genetics plays in beta cell dysfunction. This experience as a scientist enables Tom to effectively communicate with clients and inventors seeking patent protection or counseling.

Tom has published peer-reviewed scientific journal articles, including multiple articles in the *Journal of Medicinal Chemistry* and the *Journal of Cardiovascular Pharmacology*. Tom has been published in the *National Law Journal* and coauthored book chapters in the American Bar Association's
